

Generating the Power of Quality

The next generation 200kW Tactical Quiet Generator (TQG) set incorporates the latest electronic and digital technology. These rugged, reliable and easy to maintain military gensets are designed to meet the increasing need for more power in the field.

The 200kW TQG set was designed to perform in all military environments with a high level of reliability and maintainability. It uses an electronically fuel-injected diesel engine and an advanced electronic diagnostics and prognostics package. The 200kW also utilizes a state-of-the-art digital control panel. This next generation military generator set (along with the 100kW) is also the first to employ Interactive Electronic Technical Manuals. Support of the 200kW sets is simplified by use of our ESSlbuy program. These rugged and innovative generator sets were designed to meet the increased power requirements of our modern military.

Technical Specifications

Features

- Trailer-mounted capability
- Aluminum frame
- Low noise
- Easy access
- Low maintenance and operational costs

Power output	200kW @ .8 power factor
Voltage	120/208V reconnectable to: 240/416V (3 phase)
Engine	Caterpillar C12
Generator	Marathon
Weight	9600 lbs. dry
Dimensions	114 L x 50 W x 75 H inches
Sound level @7m	74 db(A) at full load
Fuel tank capacity	8 hour (147 gal.)
Tests	MIL-STD-705 and 810
Fuel	JP-8, JP-5, 1-D, 2-D

Specifications subject to change without notice
